PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building web applications—2+ of those in hands-on production environments. My technology stack centers on React and TypeScript, with additional full-stack familiarity in Next.js, Node.js, Python and C. I'm continually deepening my understanding of both computer science and human-centered design. I believe in the power of freedom and individuality—values that shape how I build, collaborate, and contribute. Seeking extraordinary opportunities—projects and teams that value creativity as much as code.

TECHNICAL SKILLS

Languages: **HTML5, CSS3, JavaScript (ES6+), TypeScript, SASS/SCSS**

Frontend: **React, Next.js**

Styling & UI Libraries: **Styled Components, Tailwind CSS, Bootstrap, Bulma, jQuery**

Testing: **Jest, Vitest, Cypress, Playwright**

Build Tools: **Webpack, Babel, NPM, Yarn**

API Integration: **RESTful APIs, GraphQL**

Version Control: **Git, GitHub, GitLab**

Design Tools: **Figma, Canva**

Familiar with: **Node.js, Python and C language**

WORK EXPERIENCE

Frontend Developer

[LeverX](#) | Hybrid

February 2025 - Present

Industry: Global system integrator & SAP Gold Partner serving 30+ sectors including manufacturing, logistics, and healthcare.

Technologies: React, TypeScript, Redux Toolkit (RTK), RTK Query, React Query, RESTful APIs, Tailwind CSS, Styled Components, Material UI (MUI), SCSS, ESLint, Prettier, Husky, Jest, Vitest, Cypress, Playwright, Responsive Design, Performance Optimization, Agile

Frontend Developer

[VideowindoW](#) | Remote

July 2023 - March 2025

Industry: Deep-tech company specializing in smart glass façades that double as transparent video displays, enhancing sustainability and user experience in public environments like airports, museums, and corporate buildings.

Technologies: TypeScript, React, GraphQL, Bulma, SVG (browser-native), REST APIs, CMS frontends, UI/UX design, Performance optimization

EDUCATION

BSc in Software Engineering

Technical Institute of Amsterdam ([AmsterdamTech](#))

2024 - 2027 (in progress)

Relevant coursework:

- Programming Foundations: C (Programming Language), Programming Languages & Paradigms
- Core CS Concepts: Algorithms, Data Structures, Theory of Computation
- Systems & Architecture: Operating Systems, Computer Architecture
- Software Engineering: Software Engineering Principles, Web Development, React, UX/UI Design
- Networking & Security: Networking and Communication, Cybersecurity & Cryptography

PROJECTS

Cloned Landing Pages

Recreated landing pages for: [Netflix](#), [Spotify](#), [Google I/O](#) demonstrating pixel-perfect design implementation, responsiveness across devices, and attention to layout accuracy

Portfolio Projects

[Georgian Diaries](#) - A creative portfolio inspired by the culture and landscapes of Georgia (საქართველო). Focused on expressive visual design and localized storytelling through modern web technologies. A full-stack project built with React, TS, and Node.js, hosted on Netlify

[Dreamers Journal](#) - A conceptual website where users can anonymously share their dreams and wishes with the world. Designed and built to foster emotional expression, community, and introspection. Another full-stack project built with Python/Flask and hosted on Render/Vercel

Source Codes

All my project repositories are available open-source on [GitHub](#).

ADDITIONALS

- Besides my native language—**Georgian**, I am fluent in both **English** and **Russian**. Currently in the process of acquiring proficiency in **German**.
- Passionate about travel, with a love for animals and a keen interest in cinema.
